

\$100 REBATE/CASE

1 case minimum. Must purchase from an approved distributor.

Deadline for submissions December 31, 2023.

Rebates will be in the form of credit on your account with your distributor by February 2024.

Kerb® SC T&O specialty herbicide is a proven, versatile tool for poa annua control, offering options for pre-overseed, cleanup and season-long performance. Ideal for all warm-season turf, Kerb can be used on golf courses, sports fields and commercial lawn care sites. Kerb's multi-site activity provides control where other herbicides no longer work, including poa annua resistance to other Group 3 herbicides, making it an ideal rotation product for your IPM program. Now fully backed by Corteva Agriscience poa annua guarantee program (see program detailer).

ALS Resistant Poa Annua Trials

Applications January 20 and February 9, 2011
